**MVMA**

\*The Milwaukee Veterinary Medical Association brings top quality professional education opportunities to its members. The **amazing fees for 6 hours of CE** are brought to you through member dues and our efforts to provide sponsorship for meetings. We have eight CE meetings every year. If you are not already a member, consider joining in 2016. Dues are only \$60 for veterinarians and \$30 for technicians. Visit our website [www.southeasternwiscdvm.org](http://www.southeasternwiscdvm.org), for further information and **speaker's notes for this seminar**.

12:00 Lunch 12:45 PM Registration

1:30 Rational therapy for vomiting in dogs and cats. Dr. Trepanier

2:20 Break

2:35 Practical approach to inflammatory bowel disease. Dr. Trepanier

3:25 Break

3:40 Choosing the best NSAID. Dr. Trepanier

4:30 Adjourn

6.0 CE Credits

Julie Churchill, DVM, DACVN

Associate Clinical Professor, University of Minnesota College of Veterinary Medicine.

BS, Michigan State University; DVM, Michigan State University; PhD, University of Minnesota.

Dr. Churchill's research interests are Nutritional management of renal diseases, Nutrition needs of geriatric patients, Obesity management, Nutrition in the role of maintaining wellness, Teaching techniques, and Communication in Veterinary Medicine.

Dr. Churchill's clinical interests are weight loss management and obesity prevention; critical care nutrition; nutritional needs of geriatrics; role of nutrition in integrative medicine.

Lauren Trepanier, DVM, DACVIM, DACVCP

Professor of Internal Medicine, University of Wisconsin School of Veterinary Medicine; Director, Clinician Scientist Training Programs; Director, Small Animal Internal Medicine Residency Training Program; Member, Graduate faculties of Pharmaceutical Sciences, Molecular and Environmental Toxicology, and Comparative Biosciences.

BS, The College of William and Mary; DVM, Cornell University; Internship and Residency in Small Animal Internal Medicine, The Animal Medical Center, NY, NY; Diplomate, ACVIM; PhD, Pharmacology, Cornell University; Diplomate ACVCP.

Dr. Trepanier's research focuses on genetically determined differences in xenobiotic detoxification and their effect on individual and race/breed risks of adverse outcomes. The two major areas of research in her laboratory are: 1) the risk factors for sulfonamide drug hypersensitivity reactions in dogs and humans, and 2) the role of variation in glutathione-S-transferases and cancer risk in dogs.

Dr. Trepanier's clinical interests are clinical pharmacology and therapeutics, particularly adverse drug reactions and drug interactions; small animal internal medicine, particularly hematology and hepatology.

Speaker's notes are on our web site
