

# MVMA

The Milwaukee Veterinary Medical Association invites all DVMs, and CVTs to:

## 5 Step Behavior Treatment Plan

Case studies of a few of the common behavior issues I deal with on a regular basis including owner-directed aggression and on-leash reactivity (toward dogs, people, other triggers) with the behavior treatment plan presented as a 5 step program.

Presented by:

**Manette Kohler, DVM**  
**Veterinary Behavior Consultant**  
**Helping Hand Veterinary Behavior Counseling**

Dr. Kohler is a small animal veterinarian in SE Wisconsin with a behavior-only practice, providing behavior consultations for dogs and cats in the clients' homes. After graduating from veterinary school (UW SVM Class of '91) she practiced general small animal medicine in Atlanta for 9 years before returning to WI. She left private practice and started Helping Hand Veterinary Behavior Counseling in 2009. She has contributed as a freelance writer and columnist for nationally recognized Dog World magazine and, currently, is the "Celebrity Paw Profile"

columnist for FETCH magazine. Dr. Kohler has lectured locally and regionally, to veterinary audiences as well as pet owners and other pet professionals, on animal behavior topics including, Puppy Socialization, Canine Body Language and Bite Prevention, Dog Park Safety, Reiki for Animals, Behavior Wellness in Companion Animals and Feline Behavior. If she could have one wish granted, it would be for all pet owners to have loving, trusting, respectful and fulfilling relationships with their pets. Writing is one of her passions and she is happy to announce that her first children's book, "Bella's First Checkup" was just released.

**DATE: Tuesday, October 9, 2018**

**LOCATION: Wisconsin Humane Society, 4500 W. Wisconsin Ave., Milwaukee,**
